CUSTOMER CONTRIBUTION

A new natural gas service will require a standard non-refundable contribution.

Standard Non-Refundable Contribution Rates*:

Rate 1/11 Service – Town: \$0 Rate 1/11 Service – Rural Subdivision: \$500 Rate 1/11 Service – Rural Other: \$3,500

* Effective November 1, 2008 per Alberta Utilities Commission (AUC) Decision 2008-103; rates are subject to change with AUC approval.

Non-Standard Non-Refundable Contribution Rates:

Services determined to be uneconomic with a standard non-refundable contribution will require an additional non-refundable contribution. AUI will notify the applicant prior to installation of the service if an additional contribution is necessary.

Premise Number		Approved for Frost Condition	YES <input type="checkbox"/> NO <input type="checkbox"/>
District		Pressure	kPa
Size of Service Line	mm	Load	m3/hr x CF
Size of Riser	mm	Load Added	<input type="checkbox"/>
Estimated Length	m		

FROST CONDITIONS

Frost charges apply when frost conditions are present at the time of installing a natural gas service. Applicants are responsible for frost charges. The applicant has the option of either (Select one):

Selection 1: Proceed with natural gas service installation under **frost** construction conditions. I/we accept the additional frost charges and agree to all related terms and conditions presented. It is understood that all charges will be invoiced upon completion of the service installation.

Selection 2: Proceed with natural gas service installation under **frost-free** construction conditions only. I/we request AltaGas Utilities to carry the application over to the next frost-free period if frost construction conditions exist on the scheduled date of installation. The natural gas service will be subject to the Standard and Non-standard contribution charges applicable at the time it is installed.

Frost Construction 2008/2009	Frost Construction 2009/2010
\$430 Fixed Charge + \$6.00/metre of service line installed+ GST	\$430 Fixed Charge + \$6.00/metre of service line installed+ GST

*Total BTU Input per Hour		

Total square footage of building:

_____ ft²

Multiple meter set requirement:

_____ Meters** (see below)

** If you require multiple meter sets at the same service site, please contact us by phone at 1-866-986-5215 or by email at psaloun@agutil.com.

* AltaGas Utilities Inc. standard delivery pressure is 1.7 kPa (0.25psig)

I hereby make application with AltaGas Utilities Inc. (“AUI”) for natural gas distribution service to the service location I have described. I acknowledge the AUI Natural Gas Utility Service Rules, available from AUI by request or from AUI’s website (www.altagasutilities.com), are part of the service agreement between us. I understand the AUI Natural Gas Utility Service Rules and AUI’s standard non-refundable contribution rates are subject to change with Alberta Utilities Commission approval, and I accept I must pay the standard contribution at the rate in effect at the time of installation. I am also aware that some service applications require an additional non-standard contribution. If an additional non-standard contribution is necessary for this application, AUI will notify me and AUI will not commence work until after I have agreed to pay both the standard and additional non-standard contributions.

SKETCH

Sketch the layout of your yard site, providing measurements from quarter line/property line to building and from road to the proposed meter location. Please refer to the diagram provided for information and guidance regarding the proposed meter location.

- Natural Gas Service Application Checklist -

Prior to submitting your natural gas service application, review and ensure that all required items have been completed using this checklist.

- Selected one of Town, Rural Subdivision or Rural Other to describe the service location.
- Selected one of Residential, Commercial, Grain Dryer or Irrigation Pump to describe your service site.
- Included today's date and the requested installation date.
- Provided all applicable details of your service location, such as the civic address, lot/block/plan, or legal land description.
- Provided all applicant and co-applicant information, including full names, mailing address, and telephone & fax numbers, and all other relevant contact information.
- Included an alternate contact and contact information.
- Made a frost conditions selection.
- Listed all planned gas appliances, associated BTU ratings, and required delivery pressure if total BTU is one million or more.
- Provided the total number of meters required if a multiple meter set is needed.
- Enclosed a site plan or real property report, or for rural services, a sketch of the yard, including a clear marking of the proposed location for the gas meter.
- Provided mechanical drawings for a Commercial service.
- Signed by both the applicant and co-applicant.
